Joy Antioho-Portfolio

I'm a creative, detail-oriented Frontend Developer focused on building responsive, user-friendly websites and interactive web applications. I enjoy using React, JavaScript, HTML, CSS, and Tailwind CSS to turn ideas into clean, modern digital experiences. I love combining design with functionality, solving problems, and continuously learning new ways to improve what I build.

## Professional Experience

**Skinstric AI** — **Remote | October 2026**

***Frontend Developer***

- Developed a responsive AI-powered facial analysis application using React, JavaScript, Vite, and TailwindCSS, integrating an external api to process uploaded images and display demographic predictions.
- Engineered an interactive results dashboard featuring 3 demographic categories (age, gender and race), dynamic percentage visualizations, and selectable prediction results.
- Implemented custom CSS animations, including multi-speed rotating elements, interactive hover effects, and animated loading states to enhance the user experience.
- Built a multi-page application using React Router, incorporating image uploads, asynchronous APi requests, session storage, and responsive layouts optimized for desktop and mobile devices.

**Summarist** — **Remote | September 2026**

***Frontend Developer & Support staff***

- Developed a responsive React book-summary application using React and JavaScript, featuring interactive navigation, reusable components, and a mobile-friendly interface.
- Integrated Firebase authentication and Google Sign-In to support user login and protected application features.
- Deployed the application to Vercel, creating a publicly accessible project with a production build and a live URL.
- Built and tested the interface across desktop and mobile layouts, focusing on usability, navigation, and consistent visual design.
- Created a personalized library function allowing users to save books to favorites, and added a multi-media feature to listen to the summary of the book.

## Projects (personal)

**Lakeshore Lens Co.** *Live Demo* | *Github Link*

***Created a fully functional search platform for camera lens rentals***

- Engineered & integrated a search api for (lenses) with a fully responsive design, loading states & dynamic routing to showcase various camera lenses and an inspiration gallery using an api from Pexel.

**Netflix Clone:** *Live Demo* | *Github Link*

***Used React to build a Netflix-inspired streaming interface***

- Featuring a dynamic movie banner, and an api to search and display movie titles across many different categories.
- Incorporated Youtube for React to play the movie trailers when selected.

**Google Clone:** *Live Demo* | *Github Link*

***Developed a search engine site***

- Used a search api to create a google search page, with real time results, and active page links.

## Technical Skills

**Programming Languages:** TypeScript, JavaScript, HTML, CSS
**Frameworks:** React, TailwindCSS, Firebase, NextJS, Redux, React Query, React
**Tools & Other platforms:** Netlify, Vercel, GitHub, Vite, Figma, VsCode, Jest, Stripe, Firebase

## Education:

**Frontend Simplified** | *Certificate*

## Other

**Interests:** Photography, Travel, Sports
